

x ≤ 50

WILDLIFE SCANNER

Pen up

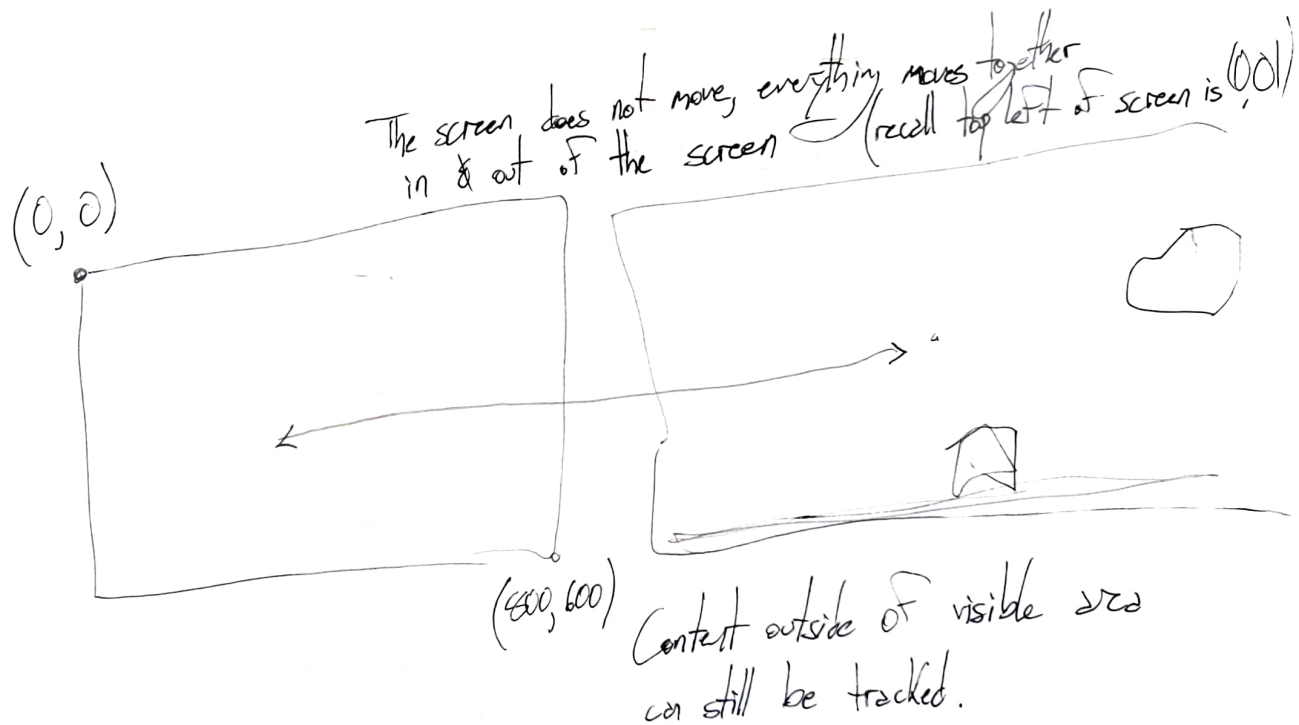

x ≥ 750

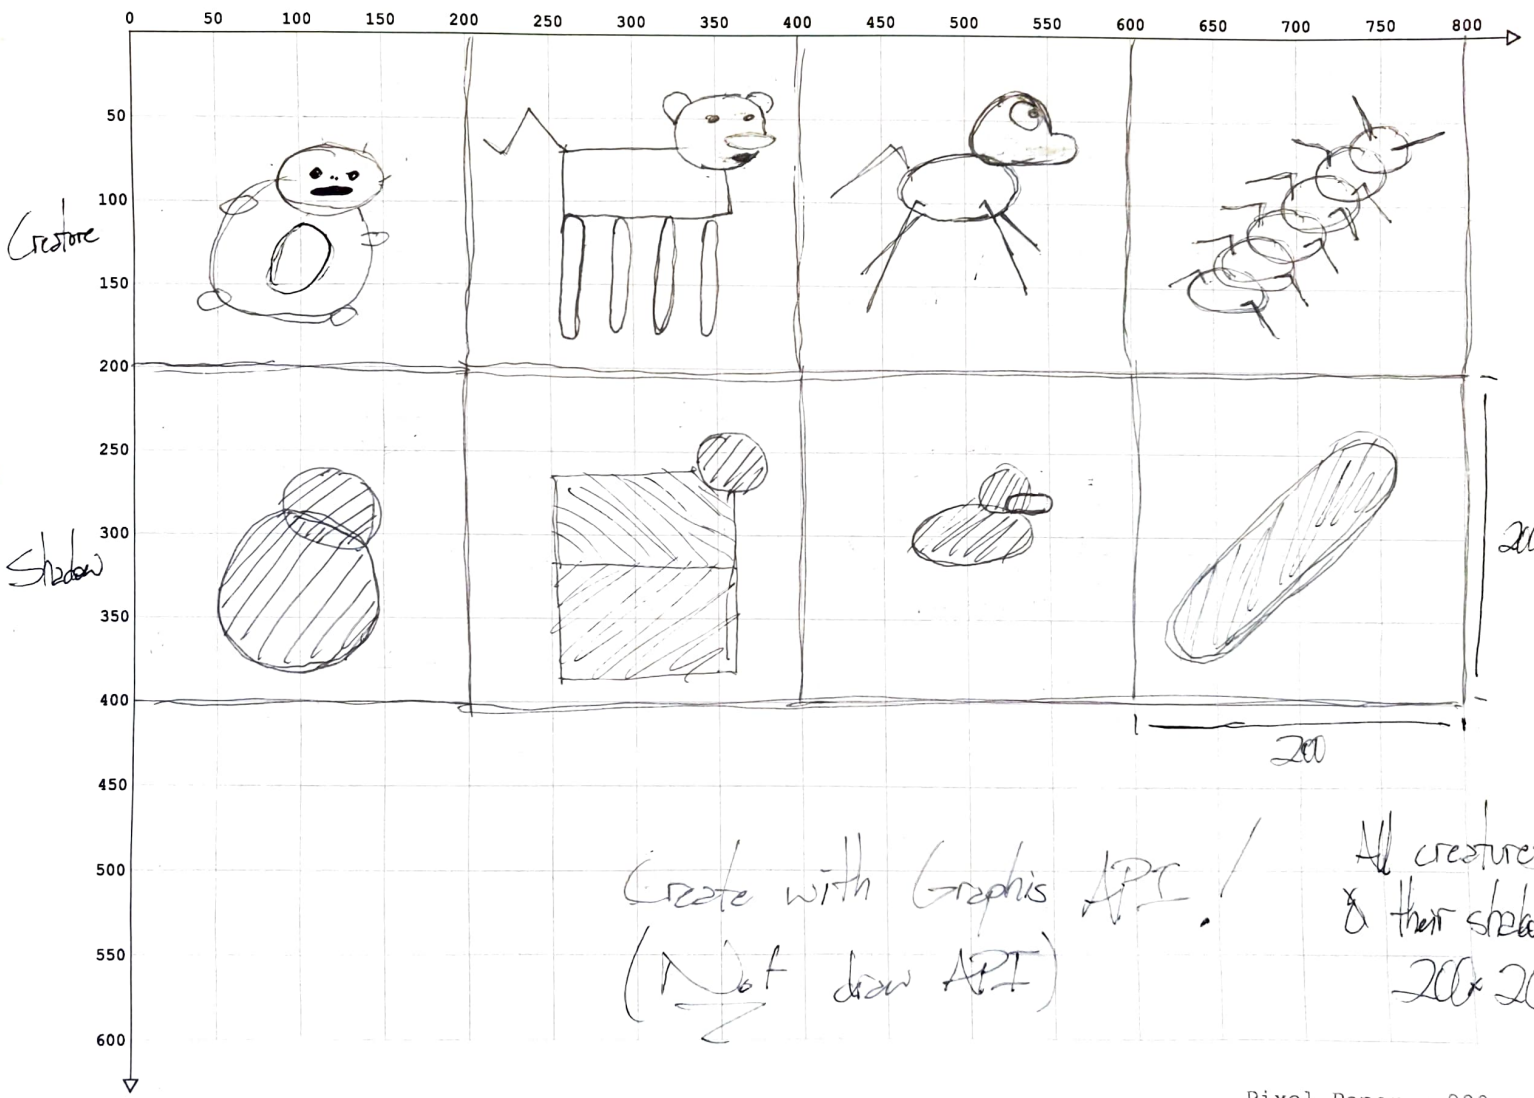

Notes: shadows are identified as creatures through the viewfinder

Pen down

Problem: Changing player look direction

$\Rightarrow$ everything is offset by the player look variable (Vector 2)

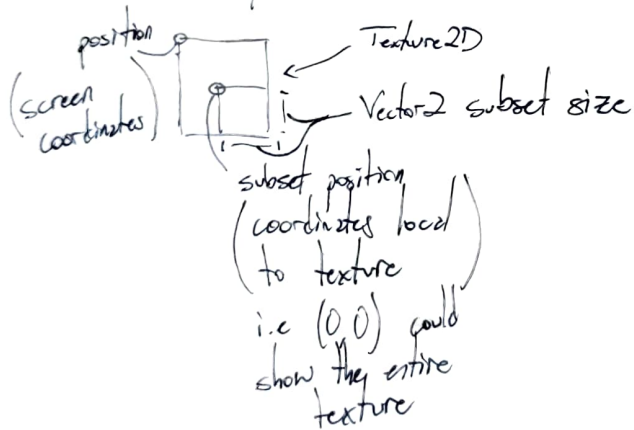

Create with Graphics API!
(Not draw API)

All creatures
& their shadows
200x200

PROBLEMS

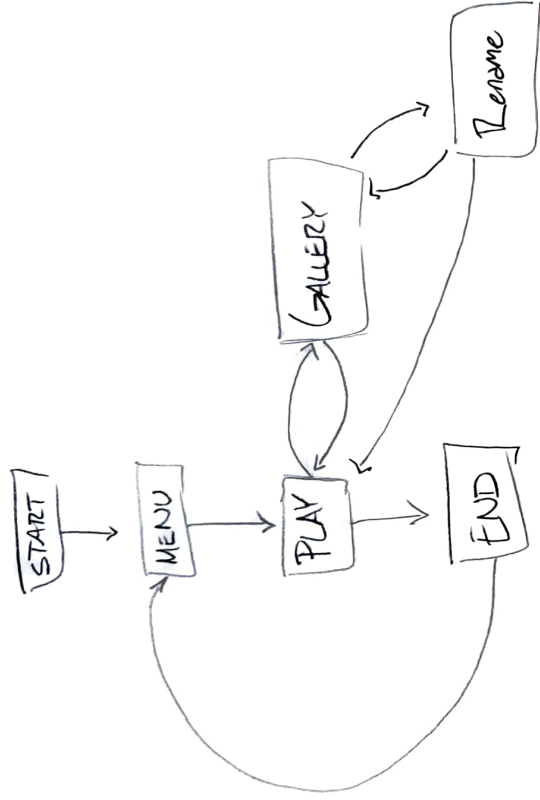

↳ half in, half out of the viewport

→ Graphics.DrawSubset should work

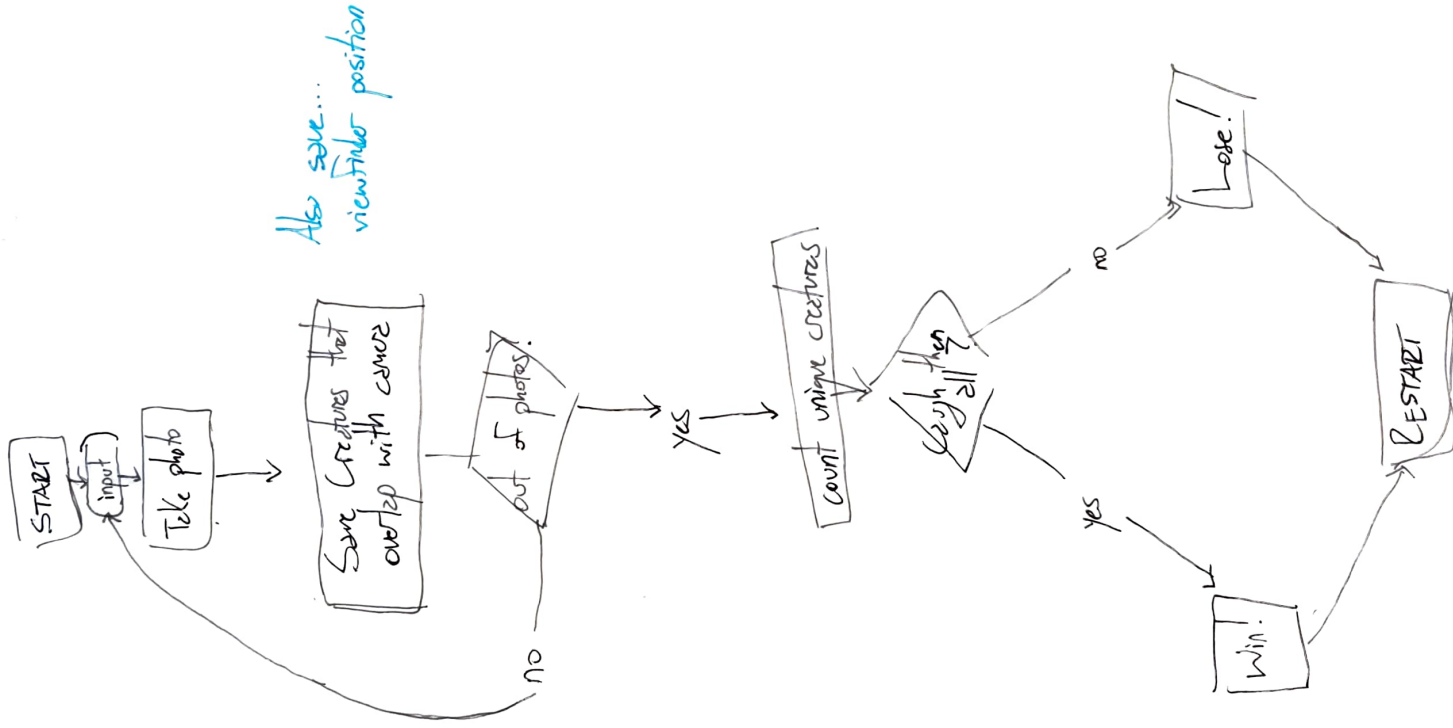

↳ each creature needs a corresponding shadow of the same dimensions

GAME STATES

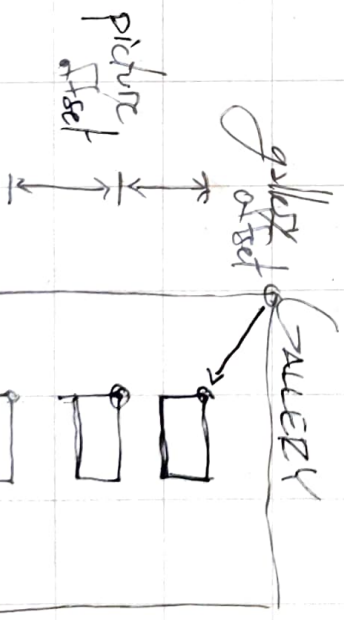

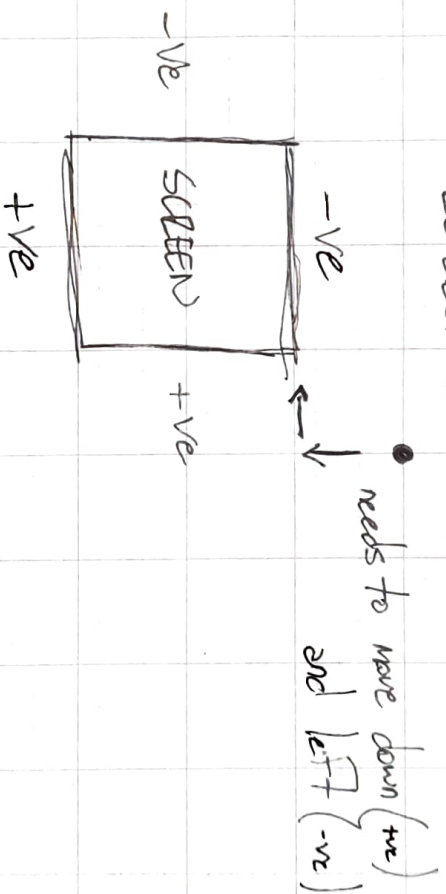

Reset the rename
Flag to false
no matter what
